

Synetech is a donation processing, data management, and technology firm specializing in caging and software development for political organizations and nonprofits.

With over ten years of experience processing contributions for high-volume, high-profile national campaigns, Synetech's experts have the capabilities and knowledge to meet the needs of any large organization.

Services

Donation processing

Our core business is direct mail contribution processing for political campaigns and nonprofits. We have processed donations for organizations with volumes ranging from a few hundred to over a hundred thousand pieces per month. Using our proprietary software and robust workflow, we can process any volume of donations effectively, accurately, and to your standards. We also can process credit card donations received from any source, including online, other vendors, and the mail.

Custom database solutions & programming

Each organization is different, and requires different solutions. Synetech can easily produce custom reports, add fields to the database, or produce custom programs for unique needs such as nightly data exports. Additionally, we have developed bespoke direct mail tracking applications for some of the leaders of the fundraising industry.

Why Synetech?

Topflight technology

Our technology has been carefully developed over 10 years to meet the specialized requirements of boutique donation processing. Our tools such as online imaging and Image Cash Letter allow for cost savings and efficiency. Our custom scanning and opening equipment ensures speed and accuracy.

People & process

At Synetech, the people make the difference. Key personnel have served us for years. When you call us, you'll talk to someone you know and trust. Our people know how to follow your requirements – not the commodity processing routine.
